Is-3-17a. In order to crack software. Role of Rho family members in cell polarity and front formation in Dictyostelium. Cell polarity and front formation have been studied most extensively in Dictyostelium discoideum, and Ras and Cdc42 GTPases, which are involved in cell polarity in many other eukaryotic cells, play crucial roles in morphogenesis of Dictyostelium. While Cdc42 is involved in cell polarity and front formation, Ras has little or no role in these processes. Ras and Cdc42 act through different downstream effectors. Cloning of p21-activated kinase (PAK), one of the downstream effectors, demonstrated that there are at least two different signaling pathways downstream of Ras and Cdc42 in Dictyostelium. PAK stimulates the polymerization of actin filaments. Other PAK homologues may be involved in the formation of cell polarity and the front. Rho GTPases, a family of small GTPases, have recently been found to be involved in the formation of cell polarity and the front. Mutant cells defective in the genes of Rho GTPases exhibit abnormal cell shape, and the dominant negative form of Rho GTPases blocks front formation and cell migration. Further molecular analysis of these mutants and identification of the precise roles of these GTPases in front formation will provide a novel insight into front formation in Dictyostelium. A computer program to find the correlation between your dreams and future events - atup ===== teeja I've used such a thing to great effect, though I've done it from a lo-fi point of view (similar to memorising passwords) -- using it as a 'shopping list' of future events to try to head off problems. It never works 100% of the time -- but on whole nights of sleep it usually works surprisingly well. BTW: the link at doesn't work for me. ----- c00p3r Very common

(Emmanuel Zimmerli, Quoted in Life Beyond the Grave). God has made us in His image. He intended that we should be glad and rejoice in each other as He is, and that we should have fellowship with each other. He put in us a crown of glory that we might be an object of envy to our neighbors and friends, that they might be made jealous of our crown. He has put a joy and a gladness in each other that we may be objects of the delight and admiration of our neighbors and friends. He has bid us to rejoice in one another, and to triumph over our enemies. This is the law which the Lord has put in His holy word. The Saviour of the world brought into existence the great Hallelujah, He was crucified as an object of terror to the Jews; that they might be a subject of admiration to His people, and a subject of envy and delight to His enemies. (Henry Ward Beecher, Talk at Ithaca, New York, May 24, 1861, quoted in "A Treatise on the Origin and Alleged Nature of the Word Hallelujah", Edited by Oliver Wendell Holmes, Jr. (Boston: Little, Brown and Company, 1892), 336-337). My God, as you watched from heaven, did you long to see the day when Christ and sinners, the whole human race, might be joined as in one bond of friendship? A bond of friendship that nothing could ever sever! - Just before the fire of the great Judgment-Day, the angels of God stand by, and see all the hosts of the children of pride and worldliness come to the Lord to be changed. Christ no longer looks at them with hatred and horror, but with benign affectionate pity. The agon
