Field of the Invention The present invention relates to rotary cutting tools having a cutting insert of a polygonal shape, such as a round, square, octagon, or the like, especially tools such as round-end milling cutters, drill bits, planer blades, and shaper cutters having a rectangular or polygonal cutting insert. In particular, the present invention relates to a polygonal cutting insert which is ideally suited for use in a milling cutter, a drill bit, or the like. 2. Description of the Related Art Milling cutters, drill bits, planer blades, and shaper cutters having a polygonal cutting insert typically employ a polygonal insert that can, in theory, allow a cutting surface to come in close contact with a workpiece at a larger number of angles. Accordingly, the polygonal insert can mill, drill, plane, and/or shape workpieces more efficiently than a circular insert.Královišti Královišti (feminine Královiště) is a Czech language surname.
